Reverse SSH Tunnel: All Interfaces on Server

ssh -p 22 -R "port:host:hostport" user@server

host

client

server

Reverse SSH Tunnel

22 (SSHD)

0.0.0.0:port:

:hostport

The socket listens to
TCP "port" and binds
to all interfaces (eth0,
wlan0, lo etc.)

SSHD:
"GatewayPorts"
is set to "yes"
